CI (or CE) Familiarization Course

1. Although the attached outline and brief memorandum of explanation could hardly be more tentative, we thought it might be well to send along a copy for your review and comment. The time allotted to each section may turn out to be unrealistic as exercises and problems are drawn up and case material selected, but in terms of emphasis this rough schedule seems reasonable to me now. The hope is for very practical exercises and for really pertinent case material. On this score we shall need your help.

2. The outline needs to be discussed more fully here before it is expanded, taking into account the CEO course, but as soon as possible I shall try to draw up a more detailed and definite outline. In the meantime your comments and suggestions would be most welcome. Very soon I hope to start seeing appropriate people in DDP about the course but shall naturally check with you beforehand.

3. One thing which might have been shown on the outline: the present plan is to include discussion of NIS Section 56 (and CI Memorandum No. 12) in the section on foreign intelligence services.
